Latham blood processor 539
procurement 559
transfusions 539, 548, 565
viability 539
Granulocytopenia 548

H

Hemagglutination
inhibition studies
blood group antigens 179
ethanol soluble substances 179
red cells 179
passive, neomycin sulfate 16
Hemagglutinins
plant 54
salvia horminum 132
Hematocrit 600
Hematologic disorders
granulocytopenia 548
hemolytic anemia
anti-T 329
transient 329
hemolytic disease of the newborn
anti-Co^a 179
secondary to Anti-Rh_o^{CD} 256
hemophilia A 583
hepatitis
B 408, 608
HBAg 111
immune disease 570
plasma exchange 570
treatment of 570
leukemia
chronic granulocytic 489
leukapheresis, child 489
leukopenia 28
neutropenia 28
thrombasthenia, Glanzmann's 124
thrombocytopenia 432
thromobcytosis 620
Hemodialysis, anti-N development 43
Hemolysis 1
Hemophilia A 583
Hepatitis 408, 608
Heterogenity of LW system 368
HL-A
phenotypes, typing comparisons 340
residual in erythrocytes for transfusion 34
Homologous blood transfusion 600
Hydroxyethyl starch
effects on 473
granulocyte function 473
platelet function 473
granulocyte collection improvement 559
Latham Blood Processor 559
leukocyte separation 449
preparation of erythrocyte suspensions 439
safety and efficacy, review 449
sedimentation 439
solution, granulocyte harvesting 461
Hypotonic shock 231

I

Immune disease
plasma exchange 570
treatment of 570
Immune serum globulin 408
Immunization, pregnancy-induced 179
Immunoglobulins, plasmapheresis, effect 467
Infection 548
ISG 408
Isoimmunization 179

K

Kidd minus-minus phenotype, caucasian 356
Kidney
damage 116
perfusion system 219

Kininogen-like substance 46
Klebsiella pneumonia contamination 260

L

Latham blood processor 559
Leukemia, acute 548
Leukocytes
  separation
    centrifugation 449
    hydroxyethyl starch 449
    safety and efficacy report 449
  Transfusion 226
    leukocyte-poor erythrocyte suspensions 439
Leukopenia 28
Leukapheresis 539
  child, of 489
  chronic granulocytic leukemia 489
  continuous flow blood cell separator 96
  dextran 23
  filtration leukapheresis 96
  repeated, donor response 96
Limulus amebocyte lysate 260
Lymphoblastic transformation 346
Lymphocytes
  separation, canine 346
  viability, frozen, washed blood, in 481
Lymphocytotoxicity 346

M

Metabolites, plasma 231
Methadone 107
Methyl cellulose 334
Micropore transfusion filter 34
Mosaicism, inherited, ABO blood groups 589

N

Narcotic addicts 107
Neomycin sulfate 16
Neutropenia 28
NIH, HL-A typing comparison 340
  fluorochomasia cytotoxicity assay 340
  NIH techniques 340
  NIH trays 340
Nonspecific reactive 608

O

Open-heart surgery 596
Organ banks 285

P

Packed cells 111
pH, autoagglutinin, anti-P 373
Phenotypes
  Bombay 237
  JK^aJK^a 356
  Kidd minus-minus, in caucasian 356
  O_h
    I antigen strength 237
    types, two, evidence for 237
Phlebotomy
  intraoperative 600
  preoperative 600
Plasma
  exchange 570
  protein solution, heat-treated 46
  treatment of immune disease 570
Plasmapheresis, effects 467
Plastics, platelet loss 87
Plateletpheresis 39, 614
Platelets
  antibodies 124
  bacterial contamination 363
  count 614
  cryopreservation techniques, evaluation 219
  function
    cardiopulmonary bypass 596
    hydroxyethyl starch, effect 473
  loss, foreign surfaces 87
  preparation 414,473
  preservation, dialysis, effect 231
  production for transfusion 39
  resuspension 231
  serotonin uptake 231
  storage 363, 414
    quality, variables 414
    temperature 414
    time, dialysis, prolongation 231
  transfusion 124, 226
  ultrastructure 614
Polyagglutination 54
Polybrene 334
Polyvinylchloride film 377
Potassium, plasma 144
Preservation 195
Protein, plasmapheresis, effect 467
PVC film 377
Pyrogen 260

R

Recruitment, donors, survey 159
Renal damage 116
Rh-hr phenotyping, results 485
Rh_o variants 256
Room temperature, platelet storage 414

S

Salvia horminum 54, 132
Salvia sclarea 54
Sedimentation 439
Smooth muscle contracting substance 46
Solid phase radioimmunoassay 608
Specificity 608
Storage
  blood
    CPD, changes 244
    frozen, viable lymphocytes 481
    toxicity of 144
  erythrocytes 195
    agitation 140
    CPD-adenine 135
  platelets
    bacterial contamination 363
    quality of, variables affecting 414
    temperature 363, 414
Surgery, cardiopulmonary, autologous blood 600

T

Template bleeding times 596, 614
Thrombocytopenia 432
Thrombocytosis 620
Tn 54
Transfusion
  autologous blood 600
  Chido-positive blood 226

erythrocytic 135
leukocyte poor suspensions, preparation
hydroxyethyl starch 439
sedimentation 439
survival 140
granulocyte 28, 96
histocompatibility antigen exposure 34
incompatible, ABO response 577
intravenous solutions, compatibility 250
leukocyte 28, 226
platelet 226
antibodies 124
production for 39
response 124
reaction 476
anaphylactic 10
anti-IgA antibodies 10
hemolytic 1
pulmonary 583
unusual to ABO incompatible 577
2,8-dioxyadenine 116

V

Vasodilator 46

W

Washing
blood, frozen, viable lymphocytes in 481
contamination of solution, bacterial 260
erythrocytes, filtration 34
frozen-washed blood 111
shelf-washed blood 111
